RASTABALM

RastaBalm is made with 100% Organic ingredients. These include: Olive oil, Candelilla wax, Coconut oil, Shea butter, Palm oil, Jojoba oil, Rosehip oil, Vitamin E oil, Rosemary oil, Neem oil, and Peppermint oil. Here are some benefits of each ingredient and how it relates to the skin...

Olive oil is a fat obtained from the fruit of the Olive Tree, where whole olives are pressed to produce olive oil.

It is a great skin moisturizer-it contains linoleic acid, a compound not made by the body, which prevents water from evaporating. Olive oil is full of antioxidants.

Candelilla wax is a wax derived from the leaves of the small Candela shrub, native to northern Mexico and the southwestern US. It is therapeutically effective in treating inflammation of the skin, including acne.

Coconut oil, when applied to infected areas, forms a chemical layer that protects the infected body part from external dust, air, fungi, bacteria and viruses. It is known to improve and heal many skin diseases.

Shea butter, along with UV protection and skin regeneration qualities, is rich in precious constituents. These include unsaturated fats, essential fatty acids, phytosterols, vitamin E and D, provitamin A and allantoin. All these are natural and make shea butter a superfood for your skin.

Palm oil is added to many skin care products not only for its anti-aging properties, but also because it provides deep moisturizing properties making the skin soft and supple.

Jojoba oil is known as the oil (wax) that most closely resembles human sebum, so the uses and benefits to skin and hair are many. People with oily skin can benefit greatly because jojoba oil can help regulate the amount of sebum (what you see as oil) your skin makes, creating less oil. Also, jojoba is used widely as a moisturizer for skin and hair.

Rosehip oil is an essential oil which is made from the seeds of the rose plant. It hydrates the skin, and is commonly used due to its moisturizing properties. This oil helps restore the balance of healthy omega oils and water which provides rehydration for the skin.

Vitamin E oil is a strong antioxidant that helps the skin to fight free radicals that damage the skin and cause fine lines and wrinkles.

Rosemary oil has antimicrobial and antiseptic qualities that make it beneficial in efforts to eliminate eczema, dermatitis, oily skin, and acne. Topical application helps in toning your skin and removing dryness. It can also give your skin a healthy, even glow. Just its scent alone aids in stress relief!

Neem oil relieves dry skin while soothing itchiness, redness and irritation. It improves general skin health and immunity, combating bacterial infections like acne, boils and ulcers.

Peppermint is antiseptic and antibacterial. Inhaling the peppermint aroma may offer memory enhancement and stress relief. It can be used topically for pain relief, hair and skin care.
